## Display and Sale of Fall and Winter Dresses

### Friday and Saturday, September 22 and 23

These gowns will be displayed on living models from the New York show room of the Frey, Sheridan Company.

Orders will be taken in all sizes from the little Junior to the Fashionable Stout, in silk and all-wool materials, both plain and fancy--street dresses and evening gowns.

A wonderful exhibit. Do not miss this display.

## Autumn Style Show

Continues throughout the week.

### COMING AND GOING

Rev. I. N. Burger's condition remains unchanged.  
Almon Eastman is confined to his home by sickness.  
O. A. Waters was in Youngstown Tuesday afternoon.  
Frank Ament had business in the Metropolis Monday.  
Lester Vaughn of Columbiana was in town Tuesday night.  
L. A. Callahan of Salem spent a few hours in Canfield Tuesday.  
T. D. Carpenter was a Youngstown visitor Monday afternoon.  
Miss Kathryn Nash has returned to school in Ypsilanti, Mich.  
Mrs. W. E. Hake and daughter Effie spent Wednesday in Youngstown.  
J. W. Baird and family spent last Sunday with relatives in Sharon.  
Miss Hattie Bond visited Mrs. J. L. Truesdale in Leetonia this week.  
Mrs. Eva Wise is visiting her sister, Mrs. G. Ed. Buzard, in Columbiana.  
Mr. and Mrs. Frank Cogill of Cleveland visited here Saturday and Sunday.  
L. D. Strock of Youngstown spent last Sunday among old friends in Canfield.  
Mrs. Susan Barrett of Niles visited Canfield relatives several days this week.  
Zenias Clay, residing south of the village, is suffering with typhoid pneumonia.  
D. C. Dickson, cashier of the Leetonia bank, was in town Monday afternoon.  
P. F. Myers and family motored to Pennsylvania last Sunday and visited relatives.  
Fred Kriner of Youngstown is spending a few days with relatives in this place.  
Clark Cronk of Middletown, Ohio, is here visiting his parents, Mr. and Mrs. W. A. Cronk.  
Miss Edna Jones, who spent the summer at Estes Park, Col., is expected home next week.  
Miss Eva Evans has accepted a clerkship in the Geo. L. Fordyce & Co. store in Youngstown.  
Mr. and Mrs. Robert Kirkbride of Berlin township were in Canfield a short time Tuesday morning.  
A. S. Porter and daughter Mary spent last Sunday in Warren with Mr. and Mrs. George Buchwalter.  
J. J. Barnes last Friday concluded a visit here with his sister, Mrs. C. C. Fowler, and went to New Castle.  
Rev. I. N. Burger, who has been in poor health for some time, is critically ill at his home on Court street.  
Vance Cronk of Wierion, W. Va., spent Saturday and Sunday here with his parents, Mr. and Mrs. W. A. Cronk.  
Eugene Liddle, who is employed in a Niles bank, spent Sunday here with his parents, Mr. and Mrs. M. H. Liddle.  
Rev. T. L. Kiernan and Dr. D. Campbell attended a meeting of Mahoning Presbytery in East Palestine on Tuesday.  
Editor H. I. Countryman and A. J. Koscho of Struthers called at the Dispatch office while in Canfield Wednesday.  
Mr. and Mrs. Silvio Russett, Mrs. Charles Credico and Mrs. Joseph Harroff spent a few hours in Youngstown Monday.  
Samuel Dickson, who spent much of the past summer with his sons in Indiana, returned to the village Monday afternoon looking hale and hearty.  
Wilbur Wilson left Monday for Columbus to resume his studies in the Ohio State university from which institution he will graduate next year.  
Mrs. Mary A. Lynn and daughter, Mrs. Irene Mock, and Mrs. Clyde S. Nedeker of Youngstown spent last Sunday with Dr. and Mrs. J. M. Kennedy.  
Mr. and Mrs. C. T. Agnew of Youngstown, taking an automobile trip through Mahoning and Portage counties, were in the village Thursday morning.  
Miss Ruth Templin, daughter of Mr. and Mrs. S. C. Templin of Garrettsville, formerly of Canfield, this week entered Miami university to complete her education.  
Mr. and Mrs. W. W. Wirt of Boardman, Mr. and Mrs. Myron Wirt and child and Mrs. W. H. Ruhman of North Lima spent last Sunday here with Mrs. Monroe Kirk.  
Mrs. Bertha Buckingham on Wednesday concluded a visit of two weeks here with her friend, Mrs. D. Campbell, and left for her home in Stevens Point, Wis.  
Attorney and Mrs. W. H. Woolf of Youngstown were in the village Wednesday afternoon. Mr. Woolf is the democratic candidate for prosecuting attorney and is planning to put up a vigorous fight for election.  
S. M. Burkholder, who lives on the Columbiana-Canfield road, was in town Wednesday and called at the Dispatch office. He said his large peach orchard is bearing well and picking has been progressing for several days.  
W. E. Rose of Rosemont was in the village Thursday morning. He expects to move to Canfield the second week in October and take possession of property on North Broad street recently purchased of C. P. Wright.  
Mrs. Mary York, who recently underwent a surgical operation in the Youngstown hospital, is now at the home of her daughter, Mrs. Casper Kriner, and hopes to be able to return to Canfield within a few days.  
H. D. Miller of Calla was in town Tuesday morning. He recently sold his farm and on Oct. 3 will have a public sale and soon thereafter will move to Canfield, having rented Roy Dickson's residence on Court street.  
Miss Alice Haswell, who spent two months here with Dr. D. Campbell and family, left Wednesday for Washington and Philadelphia where she will visit friends a few days before resuming her musical work in New York.  
L. E. Hawkins and family and Mrs. Sarah Ouel of Berlin Center, Mrs. A. C. Whitmore of Bedford, Mrs. A. A. Barbo of Bristolville and Miss Margaret Mercer of Pittsburgh were Sunday guests of Dr. H. T. Hawkins and family.

John Rowan was in Youngstown Thursday afternoon.

Misses Hannah Ferrell and Hazel Hubble went to Columbiana Wednesday evening to visit relatives.

Mrs. Margaret McClave and two children and Elmer McClave were in Youngstown Wednesday afternoon.

Mr. and Mrs. M. J. Neff, Mrs. John Sanzenbacher, Mrs. Elizabeth McClave and Mr. and Mrs. E. E. Masingham were among the Canfield people who attended the East Palestine fair Wednesday.

### HOW TO BRIDGE GRAFT

Save Fruit Trees Girdled by Mice or Rabbits or Seriously Injured by Blight or Other Diseases

Bridge grafting, the use of scions or small limbs to connect the cambium above and below a large wound or girdled strip, may be practiced successfully on almost any kind of fruit tree that can be propagated rapidly by grafting. It is used more often with the apple than any other fruit, but pear trees often are treated in this way, especially in certain sections. There seems to be no reason why the method should not also be successfully used on plums and cherries, according to Farmers' Bulletin 710 "Bridge Grafting of Fruit Trees," just issued by the department. Peaches, however, graft less readily and there may be some question as to the usefulness of the method in the case of this fruit. While seldom used on shade or other ornamental trees the author, W. F. Fletcher, writes that this method of grafting probably would prove successful in overcoming certain types of injuries to them.

Mechanical injuries which may be remedied are usually inflicted by animals, by burrowing insects, or by implements carelessly used. Various diseases, such as pear blight, also local injuries which may call for bridge grafting. The trunks of pear trees are not infrequently completely girdled and killed by pear blight. Bridge grafting, if done in time, however, may save the tree.

The method also is useful when large areas of bark have been killed by sun scald or other troubles. The author of the bulletin points out, however, that protection of trees against rabbits and mice and disease is, of course, better than having to bridge graft to overcome damage.

To be effective, bridge grafting should be done in the spring before growth starts if dormant scions for the purpose can be secured.

Prepare the wound in the tree by cutting away all dead tissue and thoroughly cleansing the injured parts. If possible, sterilize by washing with a solution of bichloride of mercury, copper sulphate, or some other antiseptic. The irregular edges of the bark above the girdled tract or wound should be cut back into an even edge, far enough from the wound to make certain that healthy cambium is under the bark.

For the grafting select scions from wood of the previous season's growth, either branches which grew the preceding season or water sprouts that are only a year old. The scions should be a little longer than the space which is to be bridged, so they will arch slightly over the central part of the wound.

Bevel the scions at each end on the same side of the scion with a long sloping cut so that the wedge shaped ends thus formed will be relatively thin and permit their being thrust well under the bark without danger of separating it unduly from the cambium at the points of insertion. The placing of the scions will be facilitated if the bark at the margins of the wound is slit for a short distance at the points where the ends are to be inserted.

In placing the scions it is of the greatest importance that the cambium of the scions which is exposed in the sloping cuts at the ends be brought into intimate contact with the cambium that lies under the bark at the margins of the wounded area. The union of scion and tree can occur only where the cambium layers of the two come together. The scions may be secured in their proper positions, if need be by driving a small nail through each end into the trunk. This will aid in drawing the cambium of scion and trunk closely together.

The operation is completed by thoroughly covering the area occupied by the ends of the scions and the margins of the wound with grafting wax, strips of waxed cloth, or by some other means that adequately will prevent these parts from drying out. Some operators cover the entire wound, scions and all, with melted wax. Where the bridged portion is below or near the ground, many operators conserve moisture by covering the grafts with earth.

Where the wound is so large as to make ordinary bridge grafting impossible, another method of bridging may be used. Two year old trees are planted about the base of the injured tree and their tops grafted into its trunk above the girdled space, which has first been cleaned as in the other method. As the tops of the small trees are too large to manipulate readily in the manner described for scions, V-shaped verticle grooves extending through the cambium are cut just above the wounded area in the bark of the tree to be treated. The tops of the small trees are shaped to correspond with these grooves. The two are then accurately fitted together in such manner as to bring the cambium of oak into contact with that of the other. Small nails may be driven through the tops of the trees into the trunk, to hold the parts firmly together. The wounds incident to joining the tops of the small trees to the trunk of the large one should be well covered with wax, to prevent drying out. Sometimes cord is tied around the trunk to aid in holding the tops of the young trees in proper position.

See that the manure is well heated, by natural fermentation, before it is placed in the hotbed pit.

Use plenty of sand in the soil to be used for starting early plants.

### QUARANTINE

Sec. 4429—When a case of smallpox, cholera, plague, yellow fever, typhoid fever, diphtheria, membranous croup, or scarlet fever is reported within its jurisdiction, the board of health shall at once cause to be placed in a conspicuous position on the house wherein such disease occurs a quarantine card having printed on it in large letters the name of the disease within, and prohibit entrance to or exit from such house without written permission from the board of health. No person shall remove, mar, deface or destroy such quarantine card, which shall remain in place until after the patient has been removed from such house, or has recovered and is no longer capable of communicating the disease, and the house and the contents thereof have been properly purified and disinfected by the board of health.

Sec. 4430—No person quarantined by a board of health on account of having a contagious disease, or for having been exposed thereto, shall leave such quarantined house or place without the written permission of the board of health, and where other inmates of such house have been exposed to and are liable to become ill of any such disease, for a period there-after counting from the completion of disinfection, as follows: In diphtheria or membranous croup, fourteen days; in smallpox, seventeen days; in scarlet fever, ten days; in cholera or yellow fever, seven days; in typhus fever, twenty-one days. In cases of measles, chickenpox and whooping cough or either of them, the board of health may require the same report or case and may enforce the same quarantine and other preventive measures as are provided for in this chapter in cases of scarlet fever or diphtheria.

### SCHOOLS—HOW CLOSED

If an epidemic of disease in a locality is so severe as to demand that all public places shall be closed, then the schools may be closed either by the order of the school board or upon the order of the local board of health through its health officer.

### Frozen Desserts

Dainty Frozen Pudding.—One quart of very ripe blackberries, two cupsful of water, one and one-half cupsful of sugar, a pinch of salt, one tablespoonful of lemon juice, one-fourth cupful granulated tapioca, one cupful of whipped cream. Cook and mash the blackberries through a very fine strainer. Add the sugar and salt. Boil the tapioca in the two cupsful of water until clear. When cold add the blackberry and lemon juice and freeze.

Frozen Currant and Raspberry Pudding.—Two cupsful each of ripe currants and raspberries, two cupsful of sugar, two cupsful of water, half cupful of orange juice. Crush currants and put them into an agate saucepan with one cupful of water. Boil for three minutes and mash through a fine strainer. Mash raspberries and cover with one cupful of cold water. Boil the sugar and water for three minutes and cool. Freeze.

Frozen Banana Pudding.—Three cupsful of milk, one-fourth cupful of cornstarch, one-half teaspoonful of salt, two cupsful of mashed bananas, one cupful of sugar, one teaspoonful of lemon juice. Put the milk on in a double boiler. When hot add the cornstarch, sugar and salt, mixed with cold milk until smooth. Cook for twenty minutes. When cold add the bananas. The lemon juice is added just before closing the freezer.

Frozen Caramel Custard.—One quart of milk, two cupsful of sugar, one-half teaspoonful of salt, one teaspoonful of maple flavoring, two eggs, four tablespoonfuls of cornstarch. Heat the milk in a double boiler. Mix the cornstarch with a little cold milk, two eggs well beaten and one cupful of sugar. Add salt. Cook for ten minutes. One cupful of sugar is melted and slightly burned. To it add half a cupful of cold milk and add to the custard. When cold add the flavoring and freeze.

Flower Names.

Camellia was named from a missionary in the Orient, Kamel. On his return to France he brought with him some gorgeous specimens of a flower which he called the rose of Japan. His friends, however, gave it his name, Camellia.

Dahlia was brought from Peru by one Andre Dahl.

Fuchsia was named for their discoverer, Leonard Fuchs.

Magnolia received the name of Professor Magnol de Montpelier, who first brought the beautiful trees from Asia and America to France.

Anemone means to tremble with the wind.

Lavender, so called because the Romans put a spray of them in the water to perfume the hands. The Latin word to wash is lavare.

THE OPTIMISTIC STYLE

There is a sunny, sunny side. An optimistic star.

A beauty, beauty none can hide. Nor strain, nor touch and mar.

It is the beauty of the soul. A shining near and far.

Illuminating every goal. With lightness and power.

A joy and joyfulness anew. A blessing true and grand.

To shed a sympathetic tear. To give a helping hand.

To each and all good-will and cheer. The optimistic style.

That crystallizes every year. Into a glorious deed.

—S. H. of a Willahard.

—Was killed by comb.

One third of a highly charged electric cell to run a washing machine abroad.

### What to Do For Insect Bites

The most common bites or stings are those of the bee, wasp, yellow jacket, spider, horse fly, yellow fly, red bug or chigger, flea, mosquito and bedbug.

In case of a sting of any kind the first thing to do, of course, is to remove the sting. This can best be done with the point of a knife or needle, but care should be taken not to break the skin for fear of infection. Then the next best thing perhaps is to apply ammonia water or soda water to the affected parts.
